Art Unit: 1722

1. The following is a quotation of the first paragraph of 35

U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-17 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contain subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventors, at the time the application was filed, had possession of the claimed invention.

Claim 1 has been amended to recite that a layer "consisting essentially of chromium nitride" is formed over the electroless nickel layer. The phrase "consisting essentially of" is viewed as limiting the scope of elements following the phrase to the specified materials or steps "and those that do not materially affect the basic and novel characteristic(s)" of the claimed invention. In re Herz, 537 F.2d 549, 551-52, 190 USPQ 461, 463 (CCPA 1976); MPEP § 2111.03. It is apparent based on the amendment and corresponding remarks that this sort of scope is intended for the chromium nitride layer recited in claim 1. That is, that layer is limited to chromium nitride and other

Art Unit: 1722

materials that do not materially affect the layer and rest of the claimed mold insert.

The originally filed disclosure of the instant application, however, does not provide support for the "consisting essentially of chromium nitride" language of the amended claim. Nowhere in the originally filed disclosure is the layer of chromium nitride described in the manner to exclude other elements as the use of the phrase "consisting essentially" requires. As an example of how the chromium nitride layer is described, paragraph 33 of the specification notes that the coating formed on the insert "comprises a composite of electroless nickel (Ni) and chromium nitride (CrN)." Such language, using the open-ended "comprising" type phrase, does not limit the elements of the coating in the manner that "consisting essentially" does. See MPEP § 2111.03.

It is noted that the absence of other materials being described in conjunction with the chromium nitride layer does not provide support for the exclusion of other materials in the claim. Any negative limitation or exclusionary proviso, as in this case the "consisting essentially of" phrase is acting, must have a basis in the original disclosure. The mere absence of a positive recitation is not basis for an exclusion. Ex parte Grasselli, 231 USPQ 393 (Bs. App. 1983); MPEP 2173.05(i).

3. Applicant's arguments with respect to claims 1-17 have been considered but are moot in view of the new grounds of rejection.

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
